DEVIXO SOLUTIONS

Web Development Internship Program

Professional Personal Portfolio Website

Project Report

Student Name	Syeda Affaf Jeelani
Internship Domain	Web Development
Task Number	Task 01
Task Title	Professional Personal Portfolio Website
GitHub Repository	https://github.com/SyedaAffaf/portfolio-website

1. Objective

The objective of this task was to design and develop a modern, professional, and fully responsive personal portfolio website using only HTML5 and CSS3. The website presents my personal profile, technical skills, education, projects, and contact information through a clean and attractive interface.

In line with the task rules, the website does not use Bootstrap, Tailwind CSS, downloaded templates, or any other UI framework. All HTML and CSS were written by hand, with semantic markup, meaningful class names, and a consistent design system.

Learning goals: HTML5, CSS3, page layouts, responsive design, navigation, animations, UI design, and version control with Git and GitHub.

2. Technologies Used

Technology	Purpose
HTML5	Semantic page structure (header, nav, main, section, footer), forms, and links.
CSS3	Layout with Flexbox and Grid, CSS custom properties, media queries, transitions, and keyframe animations.
Google Fonts	Fredoka (headings) and Nunito (body text), with system font fallbacks.
VS Code	Code editor used to write and organise the project.
Chrome DevTools	Responsive testing on desktop, laptop, tablet, and mobile screen sizes.
Git and GitHub	Version control, repository hosting, and GitHub Pages deployment.

3. Website Structure

The website is a single-page portfolio. A fixed navigation bar links to each section, and smooth scrolling moves the visitor between them.

Section	Content
Home (Hero)	Name, professional tagline, short introduction, profile image, and a call-to-action button.
About	Short personal introduction, academic background, and career interests.
Skills	Skill cards with progress indicators for the skills I actually know.
Education	Degree, institute, study period, and relevant academic information.
Projects	Project cards with image, description, technologies used, and a GitHub or demo link.
Contact	Email, phone, location, social links, and a contact form (name, email, subject, message, submit).
Footer	Name, social links, quick navigation links, and copyright.

```

4. Design Approach

I chose a soft, friendly pastel style that still feels professional. A deep plum is used for text and headings so contrast stays high, while pink, lavender, and mint are used for highlights, buttons, and cards.

Colour palette

	Name	Hex	Used for
	Plum	#4a3f6b	Headings, navbar text, footer
	Pink	#ff9ec4	Buttons, accents, hover states
	Lavender	#c4b5fd	Borders, progress bars, alternate sections
	Mint	#a7e8d0	Progress bars, education accent
	Peach	#ffd8b8	Button gradient
	Blush white	#fffafc	Page background

Typography

- **Fredoka** for headings and buttons gives a rounded, friendly personality.
- **Nunito** for body text is clean and easy to read on all screen sizes.
- A clear size scale and generous line height keep text readable and the visual hierarchy obvious.

Layout and spacing

- Content is centred in a 1100px container with consistent section padding.
- Flexbox is used for the navbar and hero; CSS Grid is used for skill cards, project cards, and the contact layout.
- Cards share one rounded style with soft shadows, so every section feels part of the same design.
- Section titles use a pastel gradient underline to separate sections clearly.

Responsive strategy

Breakpoint	Devices	Layout changes
Above 1024px	Desktop	Three-column skill and project grids, full navigation bar.
1024px and below	Laptop	Two-column grids.
768px and below	Tablet	Hero stacks vertically, contact section becomes one column, hamburger menu appears.
480px and below	Mobile	Single-column grids, smaller hero image and headings, tighter padding.

5. Website Features

- **Fixed navigation bar** with a frosted-glass look and links to every section.
- **Hamburger menu** on tablet and mobile, built with pure CSS (no JavaScript).
- **Smooth scrolling** between sections, with scroll padding so the fixed navbar never covers headings.
- **Hero section** with name, tagline, introduction, profile photo, and call-to-action button.
- **Skill cards** with progress bars that fill as they scroll into view.
- **Project cards** with image zoom on hover, technology tags, and project links.
- **Contact form UI** with name, email, subject, message, and submit button (front-end only, as required).
- **Footer** with quick links, social links, and copyright.
- **Hover animations** on buttons, navigation links, skill cards, project cards, and social links.
- **Page-load animation** in the hero (staggered text entrance, floating profile image, drifting background shapes).
- **Scroll-reveal animation** for cards, which only activates in browsers that support it.
- **Accessibility:** visible keyboard focus styles, good colour contrast, and reduced-motion support that turns animations off for users who prefer it.
- **Fully responsive** across desktop, laptop, tablet, and mobile with no unnecessary horizontal scrolling.

6. Code Screenshots

Selected extracts from `style.css`. Screenshots of the HTML and full CSS from VS Code can be placed below.

CSS design tokens (custom properties)

```
:root {
  --ink: #4a3f6b;           /* soft plum: headings, navbar, footer */
  --pink: #ff9ec4;          /* main accent */
  --lavender: #c4b5fd;
  --mint: #a7e8d0;
  --bg: #fffafc;            /* warm blush white */
  --radius: 20px;
  --font-heading: "Fredoka", "Segoe UI", Arial, sans-serif;
  --font-body: "Nunito", "Segoe UI", Arial, sans-serif;
}
```

Responsive grid and card hover effect

```
.skills-grid {
  display: grid;
  grid-template-columns: repeat(3, 1fr);
  gap: 24px;
}

.skill-card:hover {
  transform: translateY(-8px) rotate(-1deg);
  box-shadow: var(--shadow-hover);
}

@media (max-width: 1024px) {
  .skills-grid,
  .projects-grid { grid-template-columns: repeat(2, 1fr); }
}
```

```
<html lang="en">

7. Desktop Screenshots

The screenshots below show each section of the website on a desktop screen.

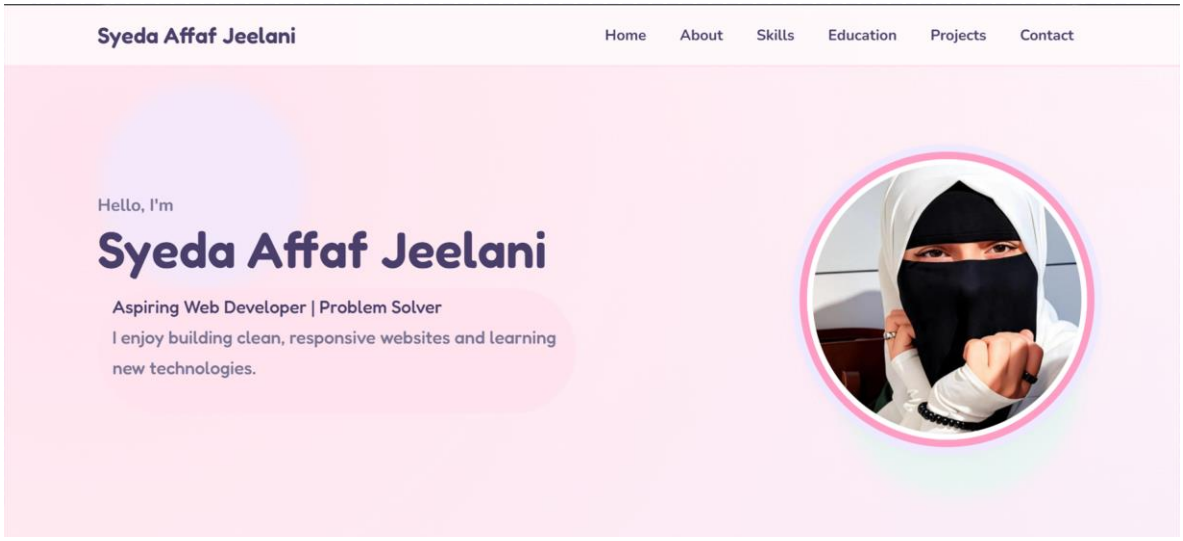

Figure 3: Home / Hero section

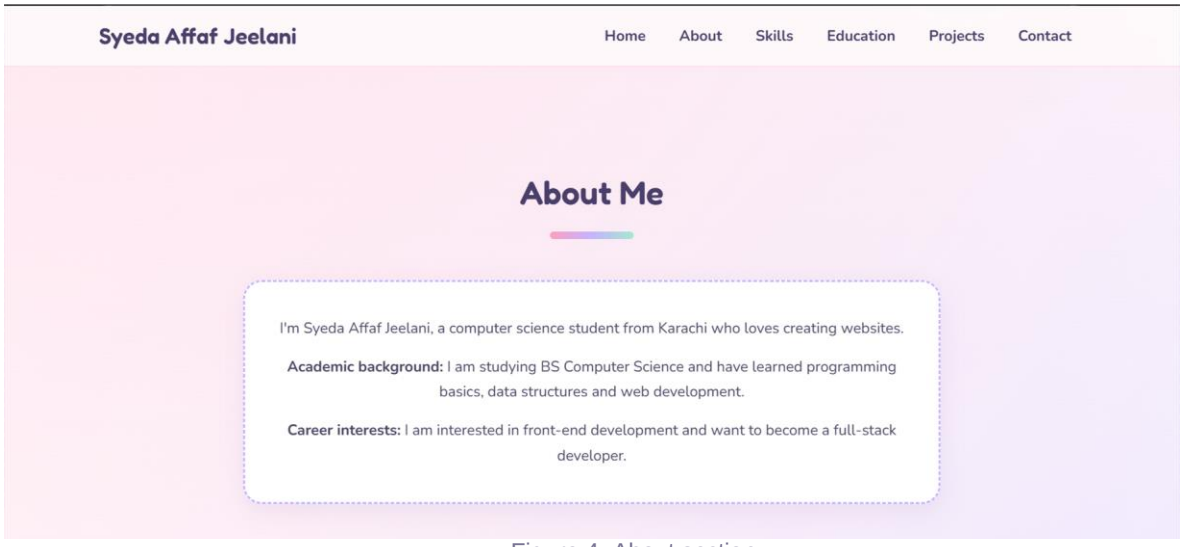

Figure 4: About section

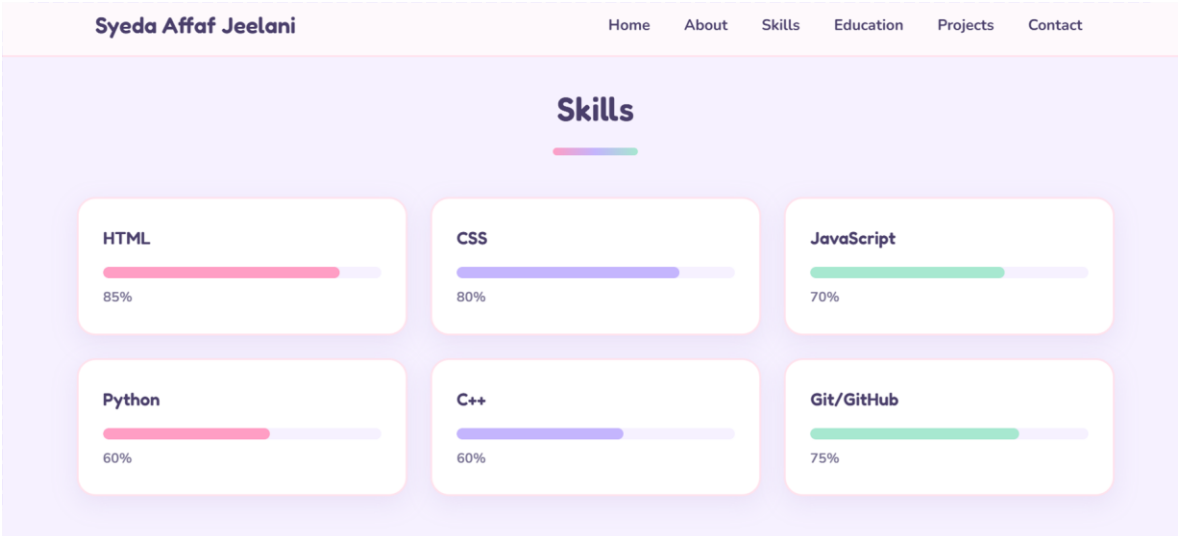

Figure 5: Skills section

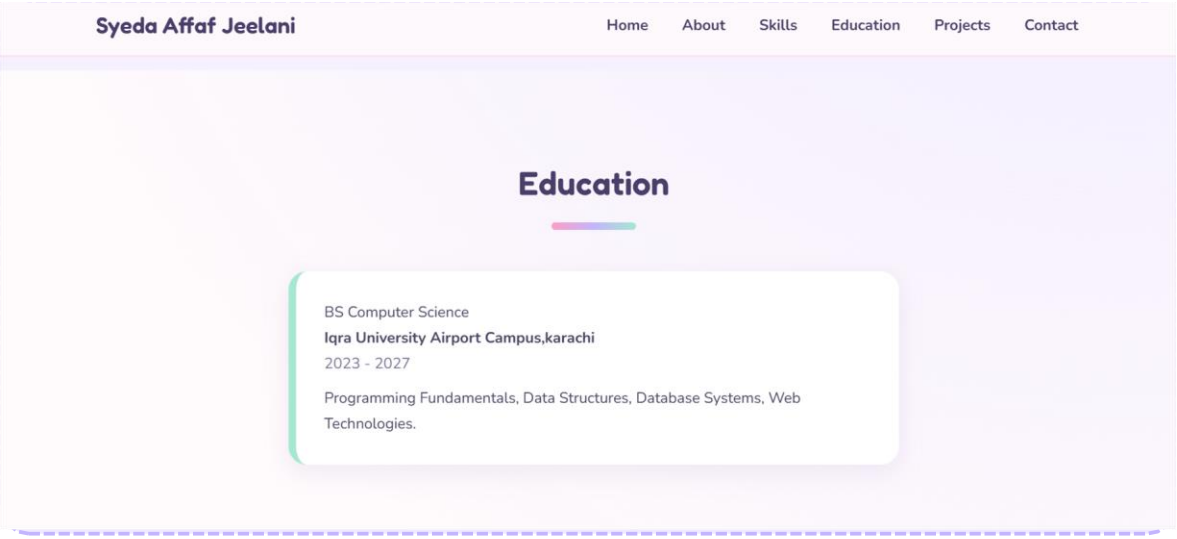

Figure 6: Education section

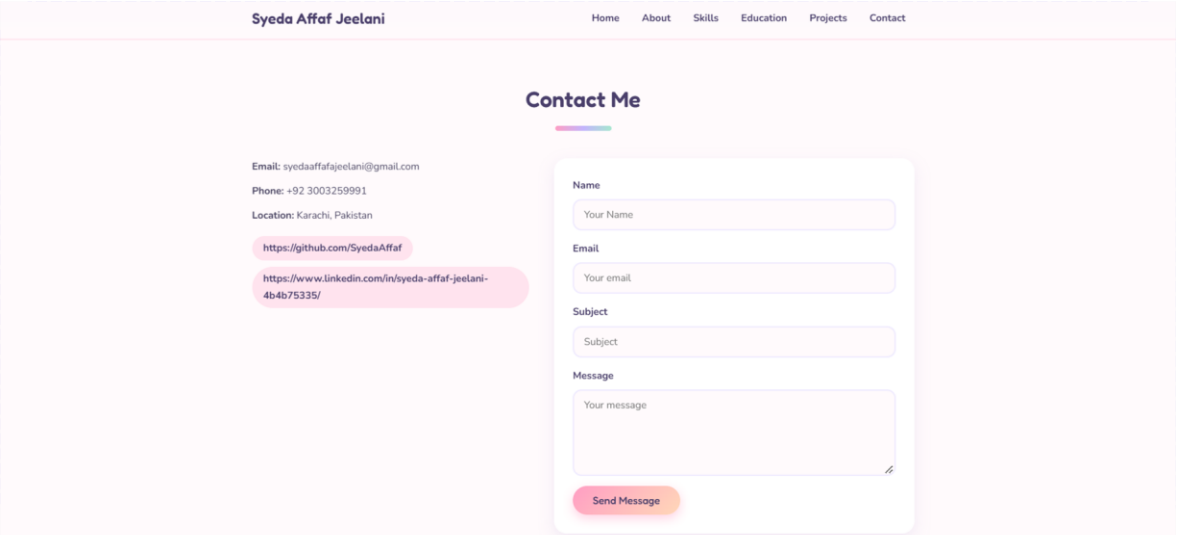

Figure 7: Contact section

Figure 8: Footer

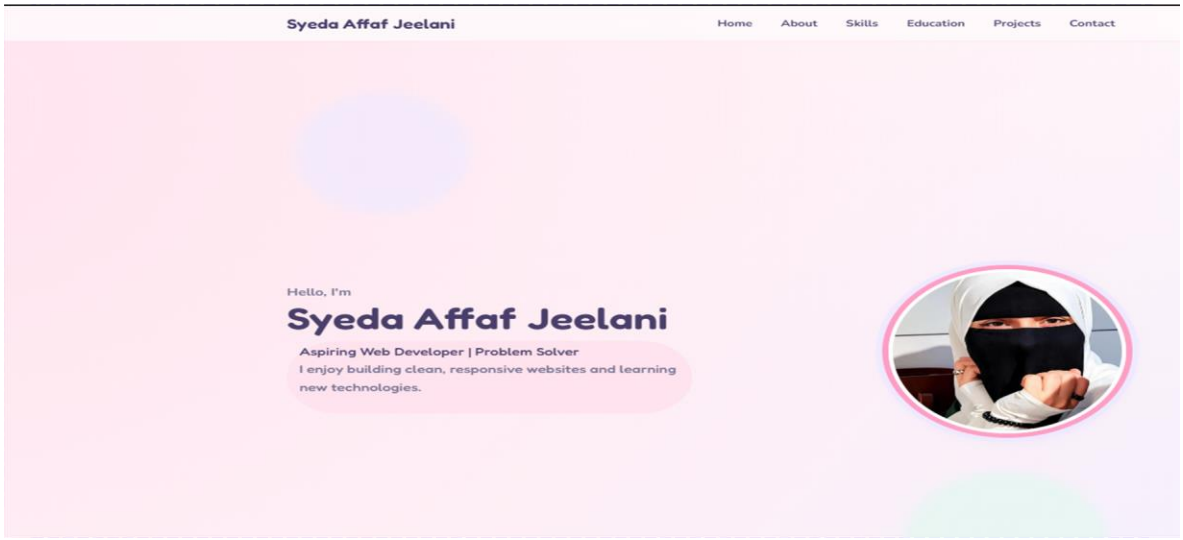

Figure 9: Full desktop view

8. Mobile Screenshots

The layout adapts to small screens with a single-column layout and a hamburger menu.

9. Conclusion

This task helped me build a complete, professional portfolio website using only HTML5 and CSS3. I practised semantic markup, Flexbox and Grid layouts, responsive design with media queries, smooth scrolling, and hover and keyframe animations. I also learned to keep a project organised and to publish it with Git and GitHub.

The final website meets the task requirements: it is fully responsive, uses a consistent colour theme, has working navigation, includes skill cards, project cards, a contact form UI, and a footer, and contains no frameworks or templates. In the future I plan to add JavaScript interactivity, a working contact form, and more projects as my skills grow.
